TASK 7: Interactive Web Form with Events & Functions

AIM

To develop an interactive feedback form using JavaScript events and functions that validates input in real-time, highlights form fields on user interaction, and shows a confirmation message on submission.

ALGORITHM

1. Start
2. Create a feedback form with input fields (Name, Email, Message)
3. Apply **onkeypress event** to validate input in real-time
4. Apply **onmouseover and onmouseout events** to highlight fields
5. Create reusable JavaScript functions for validation
6. Use **ondblclick event** for submit confirmation
7. If validation passes → show success message
8. If validation fails → show error message
9. End

CODE (HTML + CSS + JAVASCRIPT)

```
<!DOCTYPE html>
<html>
<head>
   <title>Interactive Feedback Form</title>

   <style>
      body {
         font-family: Arial;
         background: #f4f4f4;
         text-align: center;
      }

      form {
         background: white;
         width: 50%;
         margin: auto;
         padding: 20px;
```

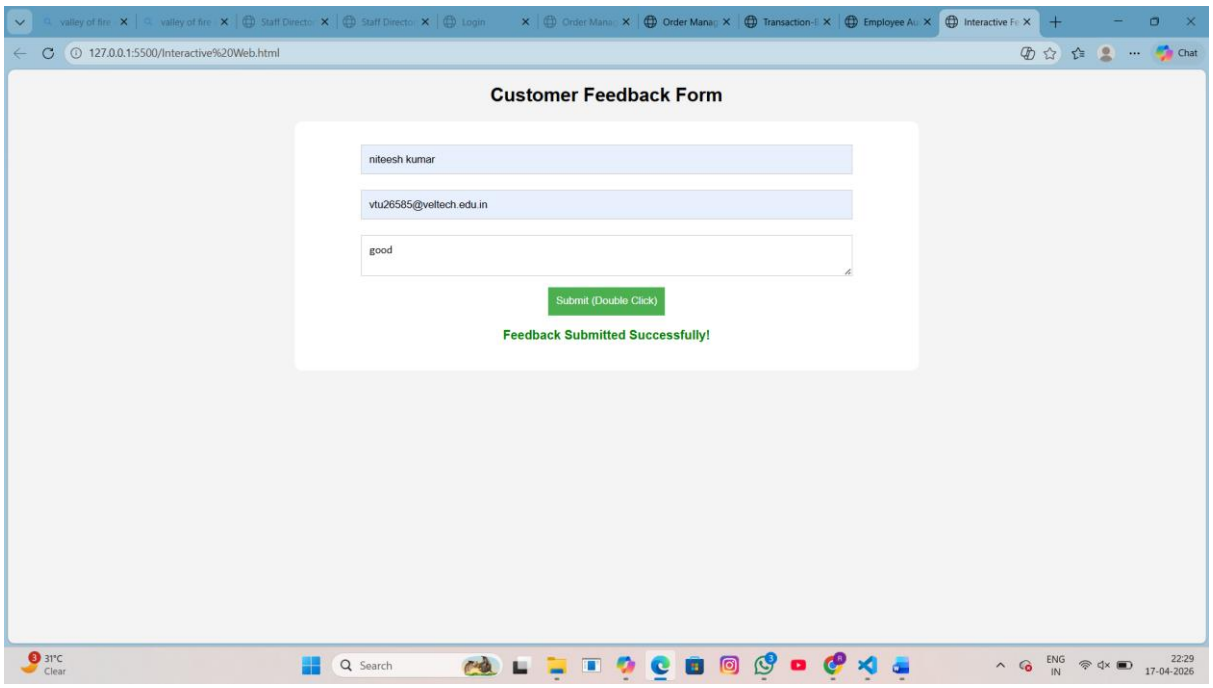
```
            border-radius: 10px;
        }
        input, textarea {
            width: 80%;
            padding: 10px;
            margin: 10px;
            border: 1px solid #ccc;
        }
        .highlight {
            border: 2px solid green;
            background: #eaffea;
        }

        button {
            padding: 10px;
            cursor: pointer;
            background: #4CAF50;
            color: white;
            border: none;
        }
        #msg {
            color: red;
            font-weight: bold;
        }
    </style>
</head>
<body>
<h2>Customer Feedback Form</h2>
<form id="feedbackForm">
    <input type="text" id="name" placeholder="Enter Name"
        onkeypress="validateName()"
        onmouseover="highlight(this)"
        onmouseout="removeHighlight(this)">
    <br>
    <input type="email" id="email" placeholder="Enter Email"
        onkeypress="validateEmail()"
        onmouseover="highlight(this)"
        onmouseout="removeHighlight(this)">
    <br>
    <textarea id="message" placeholder="Enter Feedback"
        onmouseover="highlight(this)"
        onmouseout="removeHighlight(this)"></textarea>
    <br>
```

```
    <button type="button" ondblclick="submitForm()">Submit (Double Click)</button>
    <p id="msg"></p>
</form>
<script>
// ==========================
// REUSABLE VALIDATION FUNCTIONS
// ==========================
function validateName() {
    let name = document.getElementById("name").value;
    if (name.length < 3) {
        document.getElementById("msg").innerText = "Name must be at least 3
characters";
    } else {
        document.getElementById("msg").innerText = "";
    }
}
function validateEmail() {
    let email = document.getElementById("email").value;
    if (!email.includes("@")) {
        document.getElementById("msg").innerText = "Invalid email format";
    } else {
        document.getElementById("msg").innerText = "";
    }
}
// ==========================
// HOVER EFFECT FUNCTIONS
// ==========================
function highlight(element) {
    element.classList.add("highlight");
}
function removeHighlight(element) {
    element.classList.remove("highlight");
}
// ==========================
// SUBMIT FUNCTION (DOUBLE CLICK EVENT)
// ==========================
function submitForm() {
    let name = document.getElementById("name").value;
    let email = document.getElementById("email").value;
    let message = document.getElementById("message").value;
    if (name === "" || email === "" || message === "") {
        document.getElementById("msg").innerText = "All fields are required!";
        return;
```

```
    }
    document.getElementById("msg").style.color = "green";
    document.getElementById("msg").innerText = "Feedback Submitted
Successfully!";
}
</script>
</body>
</html>
```

Output:



RESULT

An interactive feedback form was successfully developed using JavaScript events and functions. The system performs real-time input validation using keypress events, highlights form fields during mouse interaction, and provides confirmation messages on double-click submission.
